

HPV

(human papillomavirus)
By the Numbers

Every year, approximately

19,400 ♀

women and

12,100 ♂

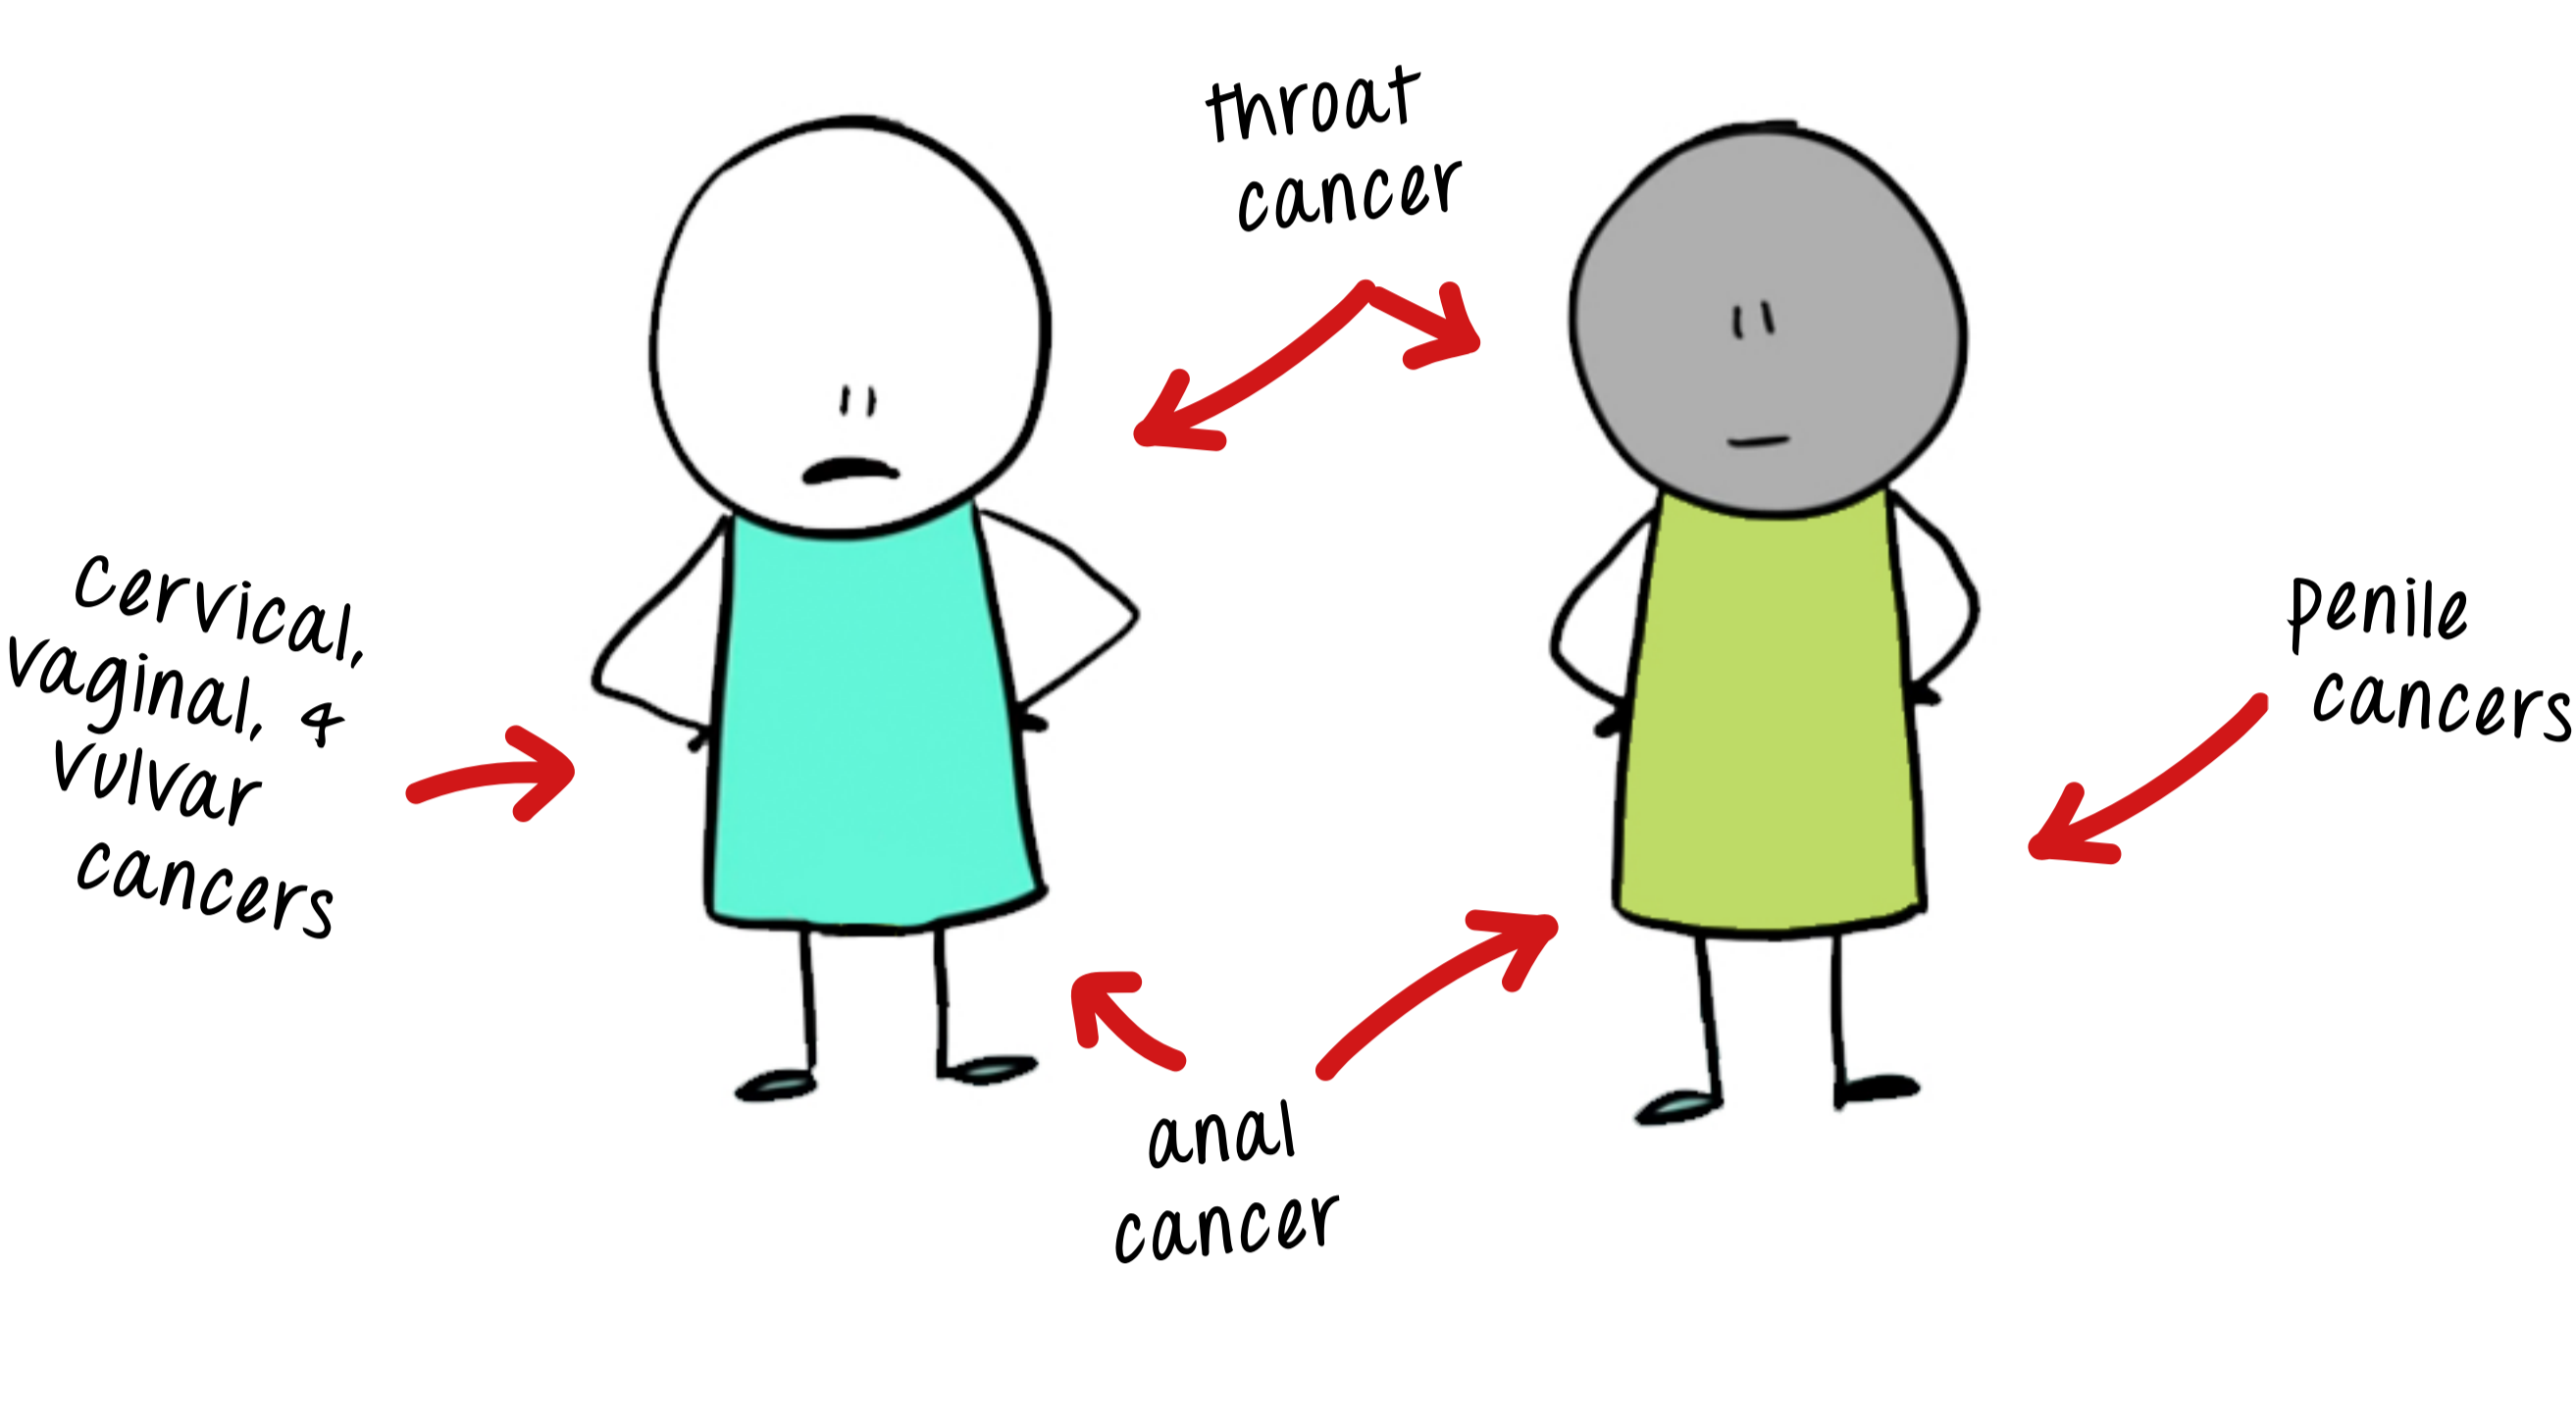

men are affected by cancers

caused by HPV.

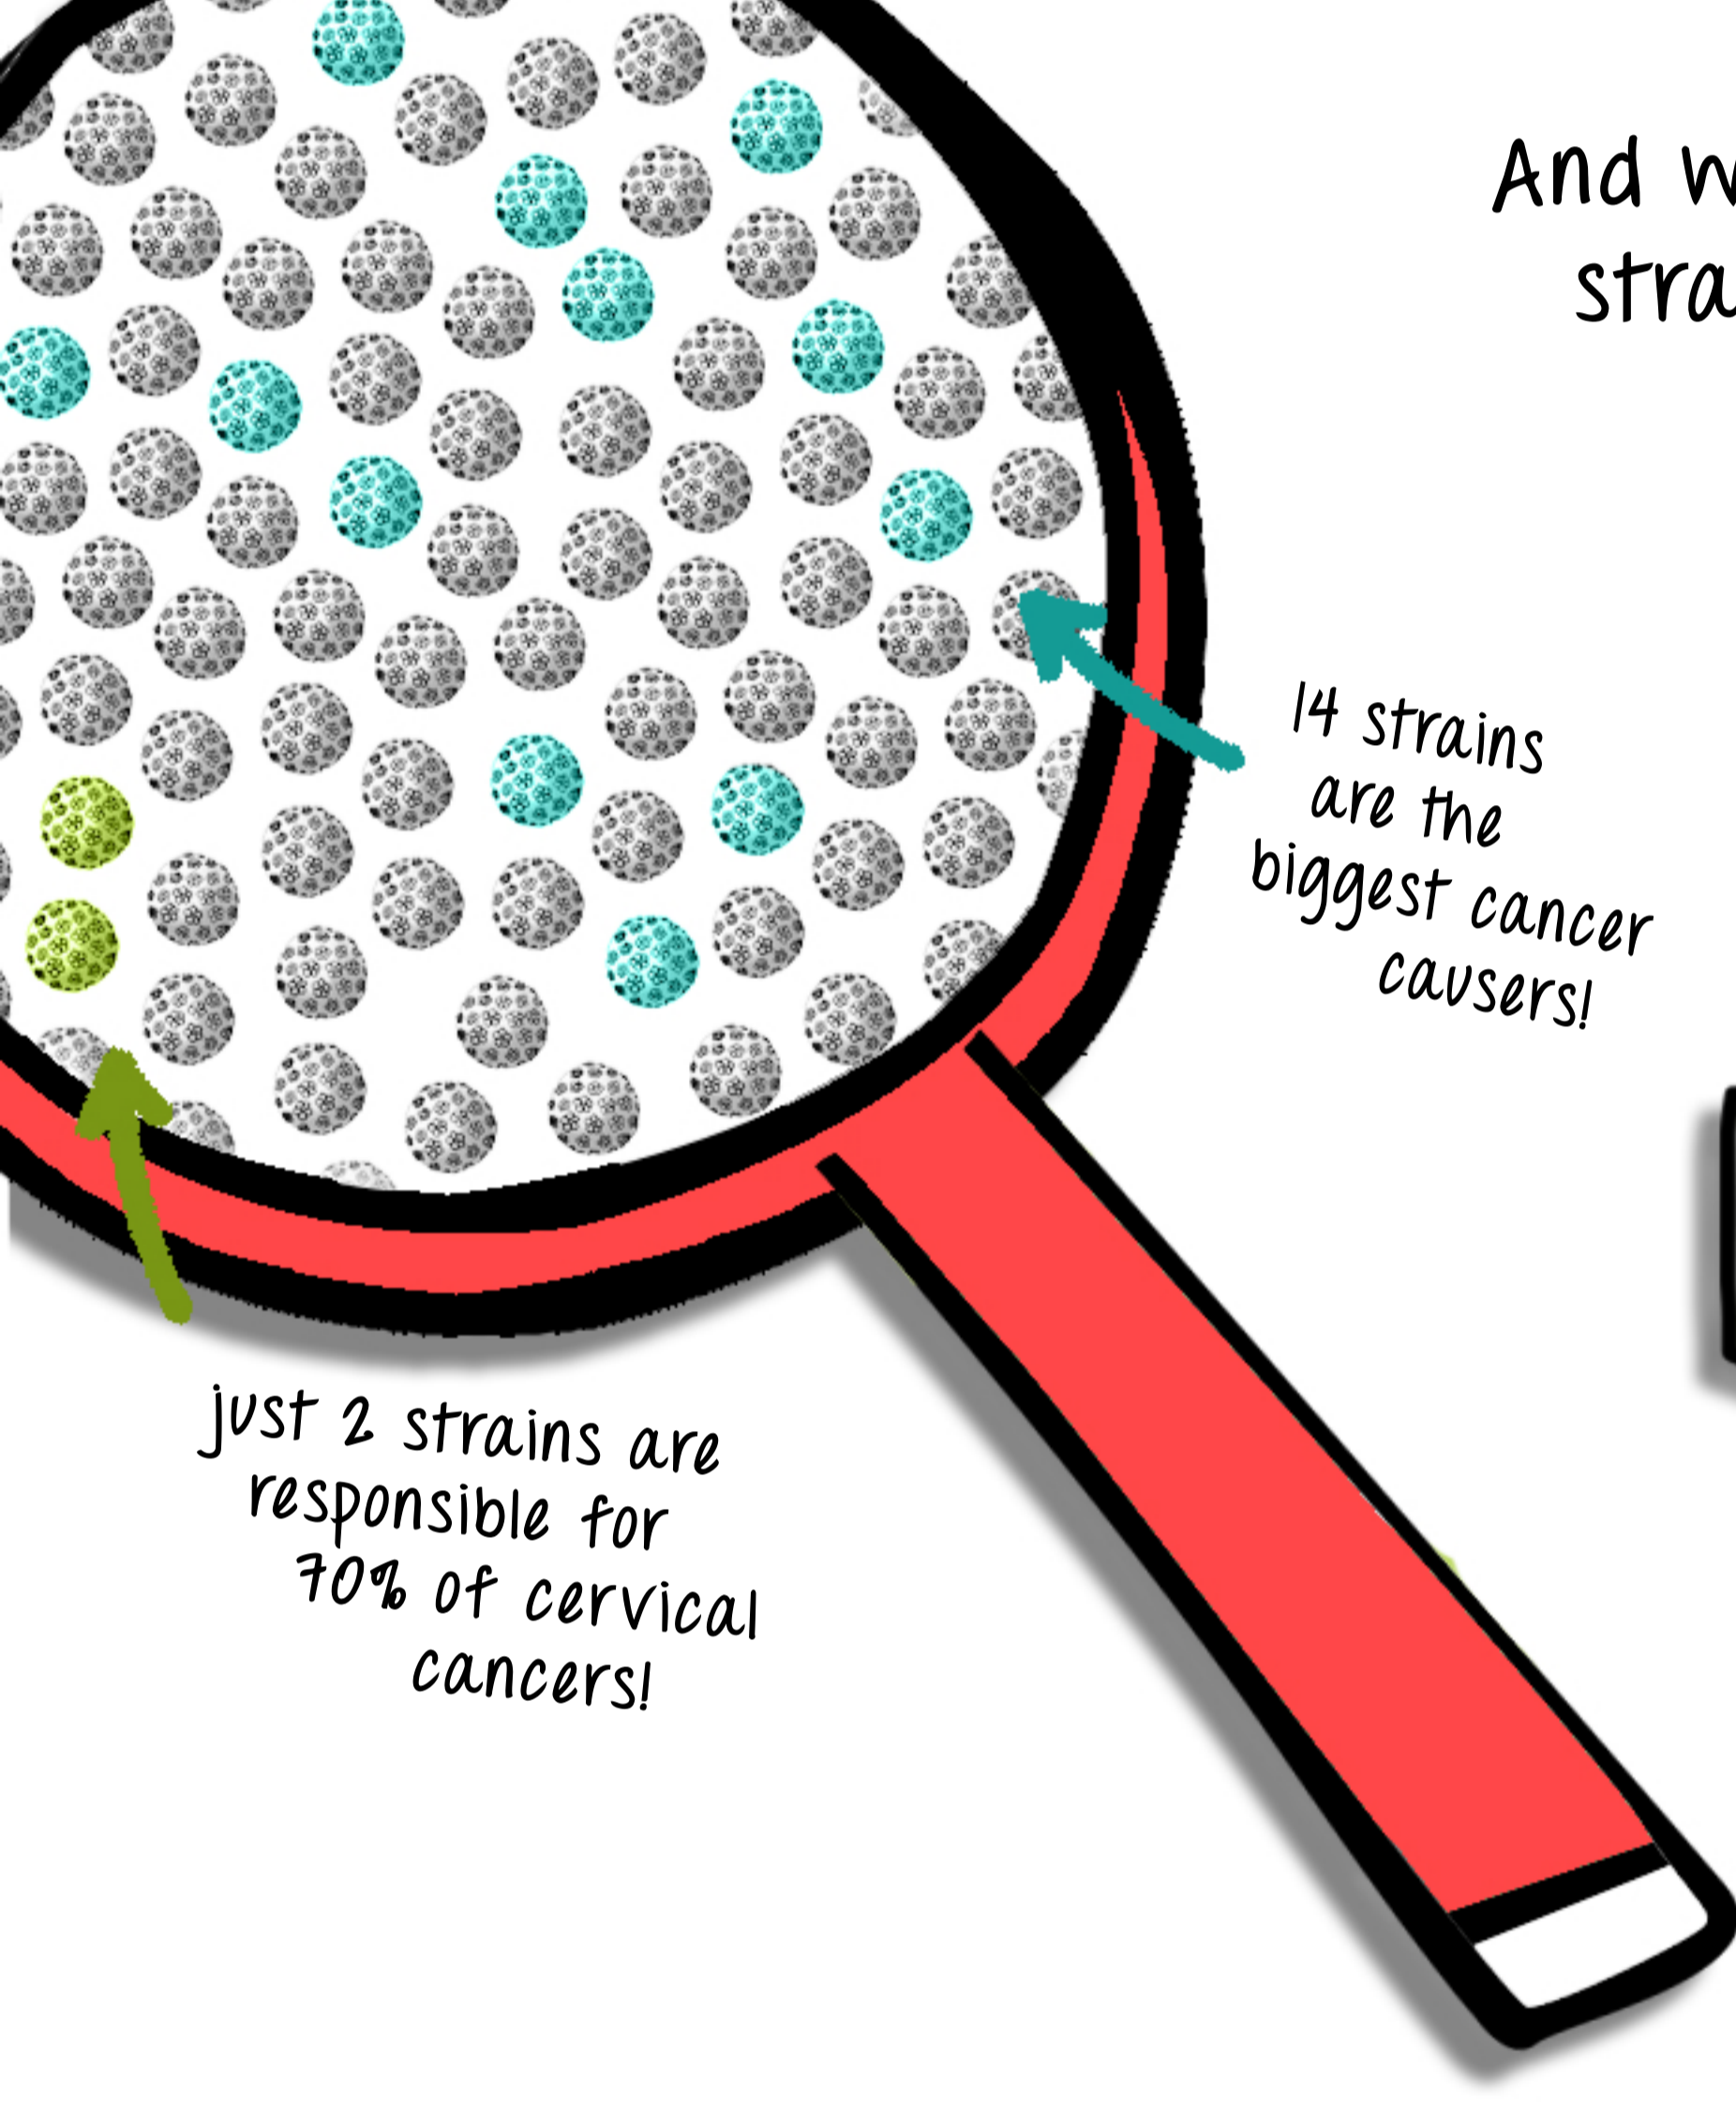

That's enough people to fill Madison Square Garden 1.5 times!

HPV can cause many types of cancer...

And while there are a lot of strains of HPV, a few are particularly notorious

14 strains are the biggest cancer causes!

just 2 strains are responsible for 70% of cervical cancers!

It's **NOT** too late!

It's safe and effective for people of any gender!

The HPV vaccine targets some of

THE MOST HARMFUL strains!

Common but less serious side effects of the HPV vaccine can include:

so talk to your doctor about the HPV vaccine today!
