Crush:

Evaluating a high tech sexual health app and SMS for girls

Genevieve Martínez-García, PhD

AGENDA

Getting people in

Making people stay

Working with others

- ✓ MOBILE TOOL
- ✓ SEXUAL HEALTH
- ✓ ACCURATE / COMPREHENSIVE
- ✓ WOMEN 15-17 YRS OLD
- ✓ THEORY-GROUNDED
- ✓ YOUTH-INFORMED

What is Crush?

CHALLENGE

A large pink circle is positioned behind the word 'CHALLENGE', partially overlapping the letters 'G' and 'E'. A horizontal pink line is located below the word 'CHALLENGE'. To the right of the main pink circle, there is a smaller pink circle with a soft shadow effect.

How to recruit and retain participants throughout a
6 month “online-only” RCT?

ASSUMPTIONS

A large pink circle is partially obscured by the word 'ASSUMPTIONS'. To the right of the main circle is a smaller pink circle with a soft shadow. A horizontal pink line is positioned below the main circle and above the text.

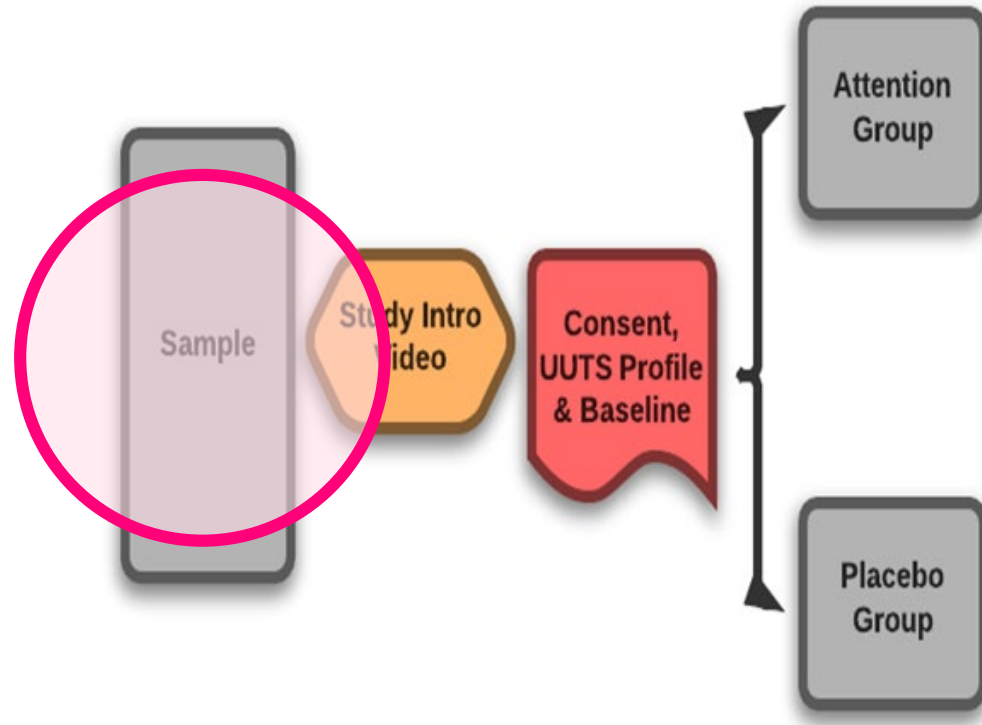

Youth are **bombarded with media** messages

Youth use **many social media** channels

Registration

Form Approved
OMB No. 0920-XXXX
Exp. Date XX/XX/XXXX

Informed Consent

Study Description: We are testing how well a health mobile app works on 14 to 18 year old girls. You may be chosen to use a sexual health app or a nutrition app. Your participation is voluntary and you can stop being in the study at any time. If you do not want to be in the study, this will not affect you in any way.

Research tasks: You will be in the study for 6 months. During this time you will be asked to: 1. Complete a study enrollment form with your contact information. 2. Complete a survey on your phone now, in 3 months and in 6 months. The survey takes 10 minutes to complete. 3. Read health text messages you will get on your phone. 4. Access the app you were assigned to.

Public reporting burden of this collection of information varies from 2 to 4 minutes/hour with an estimated average of 3 minutes/hour per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-XXXX).

Overview

Evaluation study context

Enrolling participants

Addressing scammers

Our sample and next steps

What is Pulse App?

A self-led, web-based mobile sexual and reproductive health app intervention for young Black and Latina women developed by Healthy Teen Network and Meta Media.

Goals

To increase...

- the use of highly effective contraceptives and
- visits to sexual and reproductive health clinics

... among young women in the United States.

Context of Evaluation Study

Pulse Evaluation

Funded by U.S. Department of Health and Human Services' Office of Adolescent Health

Two-arm randomized controlled trial

Pilot tested in 2016

Mirrored apps for treatment and control groups

6-week intervention:

- access to app
- unidirectional MMS text messages

Pulse Evaluation

Social media recruitment

Data collection

- baseline survey (online)
- immediate post-intervention survey (online)
- in-depth phone interviews
- app usage
- text messages

This study was made possible by Grant Number TP2AH000038 from the U.S. Department of Health and Human Services' Office of Adolescent Health.

The study is being conducted by the following organizations:

[Healthy Teen Network](#), based in Baltimore, Maryland, is a non-profit organization that promotes better outcomes for adolescents and young adults by advancing social change, cultivating innovation, and strengthening youth-supporting professionals and organizations. [Healthy Teen Network](#) and [Meta Media Training International](#) are the owners and developers of the two health mobile apps being tested in this study.

[Healthy Teen Network](#)

[Child Trends](#), based in Bethesda, Maryland, is a non-profit organization that is dedicated to conducting research and evaluating programs that improve the health and well-being of children and adolescents. [Child Trends](#) is leading the evaluation research efforts with data collection support from [Ewald & Wasserman Research \(E&W\)](#).

This project was made possible by Grant Number TP2AH000038 from the Office of Adolescent Health.

Calling tech support: Using digital technology to complement traditional modes of data collection in the evaluation of *SpeakOut*

Reiley Reed, MPH

Program in Woman-Centered Contraception
Department of Family & Community Medicine
University of California, San Francisco

Roadmap

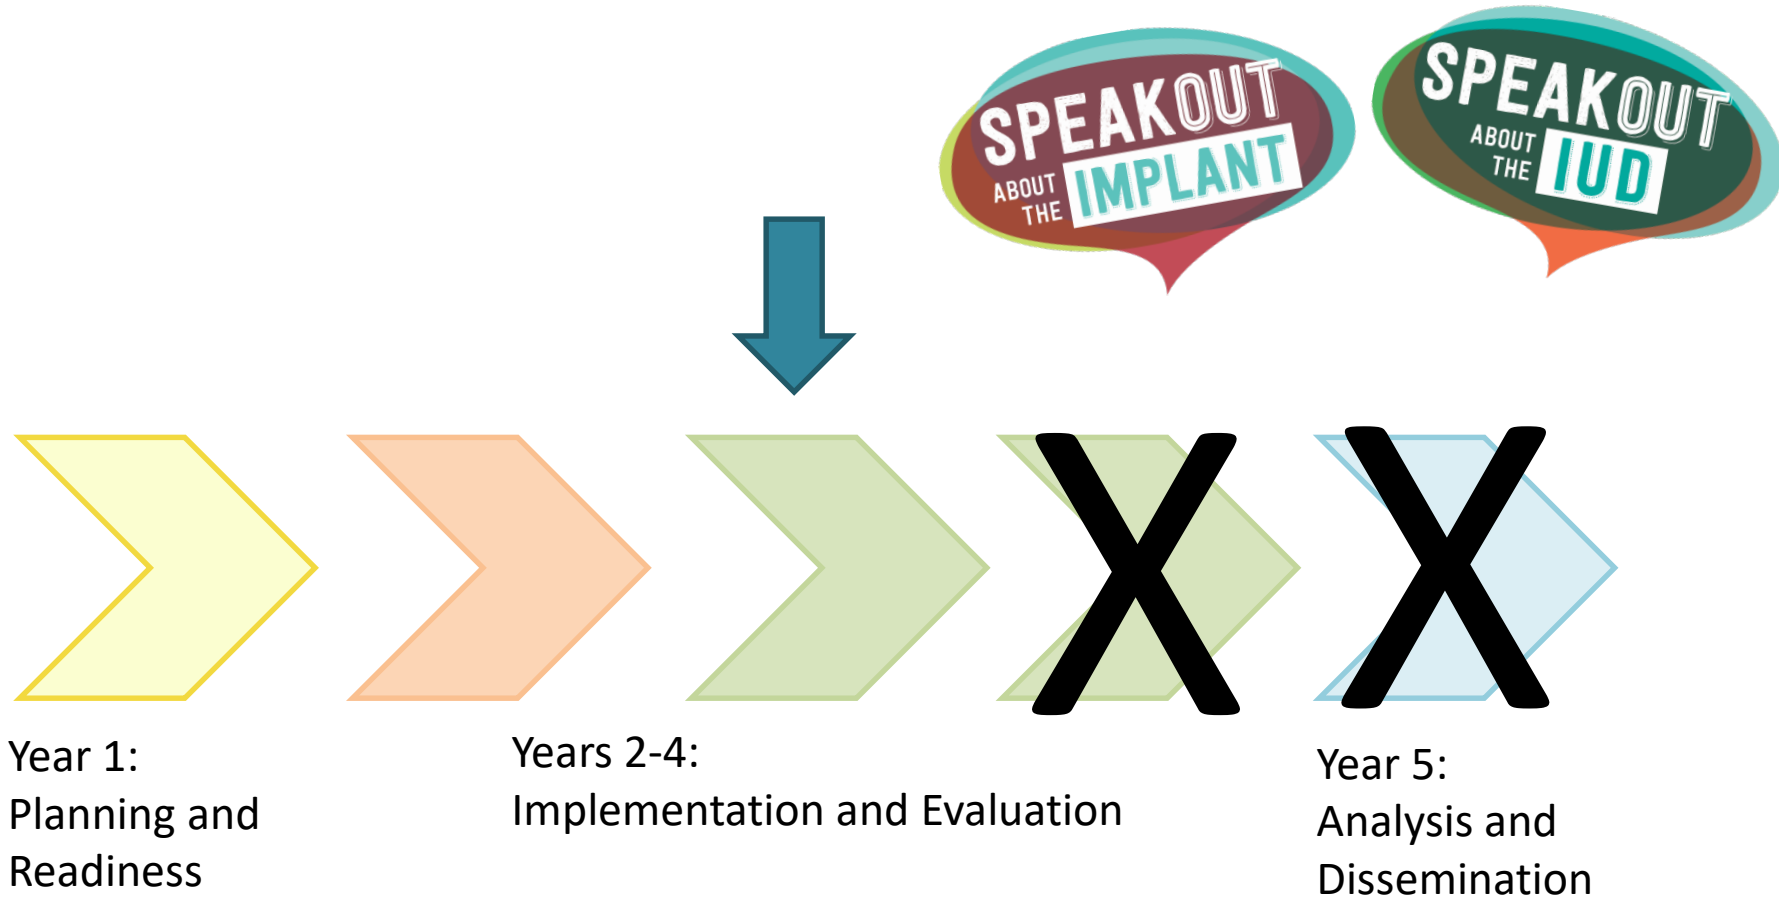

- Project background
- Content of Intervention & Control
- Evaluation design
- Technology used for evaluation
 - REDCap
 - Qualtrics
 - GoogleVoice

Context

- Social communication plays a big role in women and adolescents' preferences for contraception
- Friends and family are a trusted source of contraceptive information for youth
- IUD's and Implants (LARC) are highly effective
- Incorrect information is prevalent about LARC methods in social communication

Timeline

SpeakOut

- *SpeakOut* pamphlets and website
- Weekly text messages for 8 weeks
- Designed to be delivered to current implant and IUD users during clinic appointments
- Encourages users to share their stories and provides info on these methods

Pamphlets

SHARE YOUR STORY!

Your friends might wonder, what is it like to have an implant? You can help them find out! If you tell friends about your implant, they can decide if they want one, too.

HOW TO BRING IT UP...

You can talk to a friend about the implant when...

- » Their phone alarm goes off to take their pill.
- » They say they have heavy or painful periods.
- » They say they don't want to get pregnant.
- » You're talking about birth control anyway!

TALK ABOUT...

Why you chose the implant.

- » Different people choose different birth control methods for their own reasons. What made you like the implant?

How it felt to get it inserted.

- » Did it feel how you thought it would?

Where the clinic is...

- » ...and share the phone number or website you used to make an appointment.

How it's going for you.

- » Now that you have it, how do you like it?

How they can get the IUD for free...

- » ...and nobody has to know about it! Young people can get free birth control confidentially in California. Clinic staff can sign them up for a program called FamilyPACT so they can get it!

THEY MIGHT WANT TO KNOW...

- » The implant prevents pregnancy better than the pill or the shot.
- » You don't have to remember to take your method every day. The implant works by itself for 3 years. If you want, you can get the implant taken out at any time.

For most people, the implant is invisible.

The implant can make your period lighter or go away completely. It may also cause irregular periods or spotting.

- » Everyone is different, and their side effects might not be like yours.

Get more information and hear real stories from implant users at SPEAKOUTIMPLANT.ORG

HOW TO BRING IT UP...

You can talk to a friend about the implant when...

- » Their phone alarm goes off to take their pill.
- » They say they have heavy or painful periods.
- » They say they don't want to get pregnant.
- » You're talking about birth control anyway!

YOU MIGHT BE WONDERING...

IS THE IUD SAFE? Yes. IUDs have been used safely by millions of people in the U.S. Getting an IUD does not cause infections.

DOES IT HURT TO GET INSERTED? Everyone is different, but a lot of people say it didn't hurt as much to get an IUD inserted as they thought it would.

It's important to learn about your birth control options and find the right method for you! Ever thought about using an IUD? [Get to know more about it here.](#)

WHAT'S AN IUD?

The IUD is a tiny, flexible, T-shaped piece of plastic. It has either hormones in it or copper wrapped around it, which make it hard for a sperm to meet an egg and cause a pregnancy. It can be left in for up to 10 years depending on the type you choose.

WHERE WOULD IT BE IN MY BODY?

The IUD sits in your uterus. Your healthcare provider at the clinic will insert the IUD into the vagina and through the cervix. Once it's in, your cervix keeps it in place and you can't feel it. Your provider can easily take it out by pulling on the IUD's strings.

YOU MIGHT BE WONDERING...

IS THE IUD SAFE? Yes. IUDs have been used safely by millions of people in the U.S. Getting an IUD does not cause infections.

DOES IT HURT TO GET INSERTED? Everyone is different, but a lot of people say it didn't hurt as much to get an IUD inserted as they thought it would.

CAN I GET AN IUD EVEN IF I'VE NEVER HAD A BABY? Yes! IUDs are totally safe for people who haven't had a baby.

CAN I MOVE AROUND THE BODY OR FALL OUT? Once the IUD is inserted, it doesn't move. It's very unlikely that it will fall out.

WHAT ABOUT THE IUD AND STIS? IUDs do not protect you from sexually transmitted infections. Use condoms to prevent STIs.

MANY PEOPLE LIKE THAT IT IS...

- **EFFECTIVE** - It's over 99% effective, so it's better at preventing pregnancy than other methods like the pill or the shot.
- **CONVENIENT** - The IUD works by itself! You don't have to remember to do anything.
- **LONG-TERM** - The hormonal IUD lasts 3-5 years, and the copper IUD lasts up to 10 years!
- **REVERSIBLE** - You can have it taken out at a healthcare center any time you want.
- **ESTROGEN-FREE** - The hormonal IUD only has the hormone Progesterin, and has fewer hormones than methods like the pill or the shot. The copper IUD is hormone-free.
- **PRIVATE** - No one can see that you have an IUD, but if you have sex, your partner might feel the strings.

AND YOU CAN GET ONE FOR FREE!

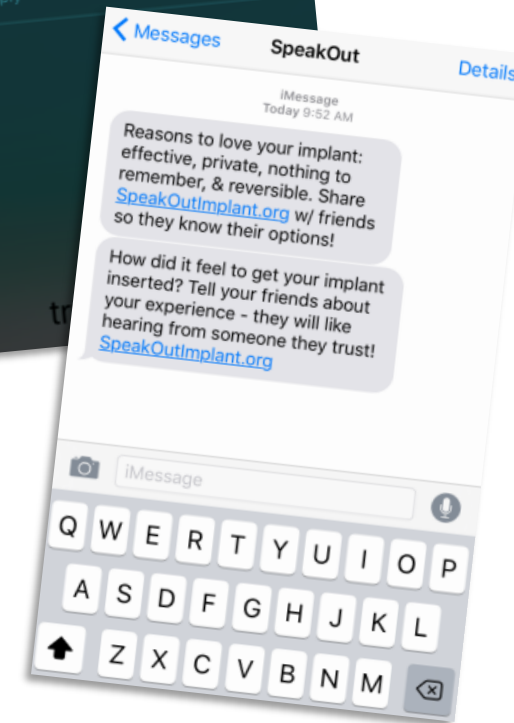

- Young people in California can get birth control for free, and no one else has to know about it!
- Ask clinic staff about how to sign up for a confidential program called FamilyPACT.

WHAT ABOUT SIDE EFFECTS?

Side effects are different for everybody. Some people say their hormonal IUD causes less cramping and lighter periods. Some people will stop having a period completely. This is totally safe.

Some people say their copper IUD causes heavier periods and more cramping. After 6 months, many people's periods and cramping will go back to normal.

Website

Real Stories

Andrea chose the implant (known as Nexplanon or Implanon) because it's great at preventing pregnancy. She loved it so much she got another when her first ones time was up!

Audrey wanted a long-term method that she didn't have to think about. Her periods are more irregular now, but she thinks it's worth it because they are lighter and less crampy.

Abigail decided to get the implant because she wouldn't have to think about it every day. She says the implant makes it possible to prevent pregnancy until she finishes school and is ready.

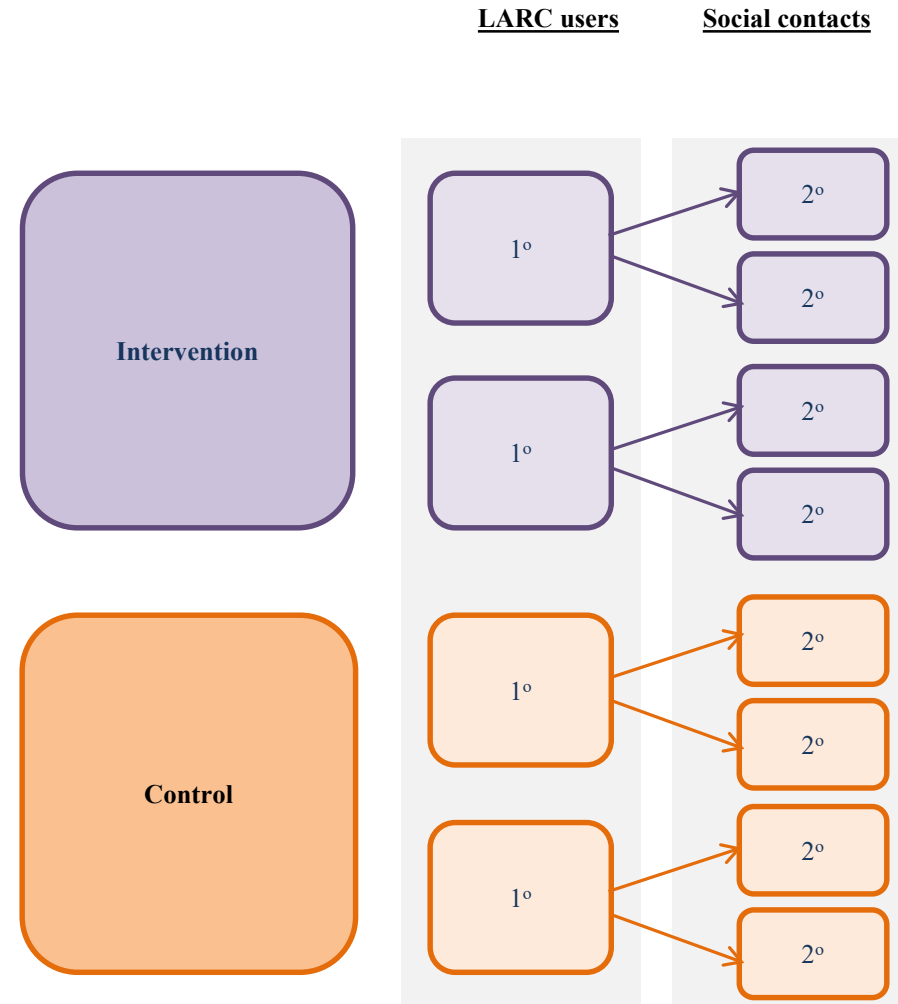

PartyWise – control Intervention

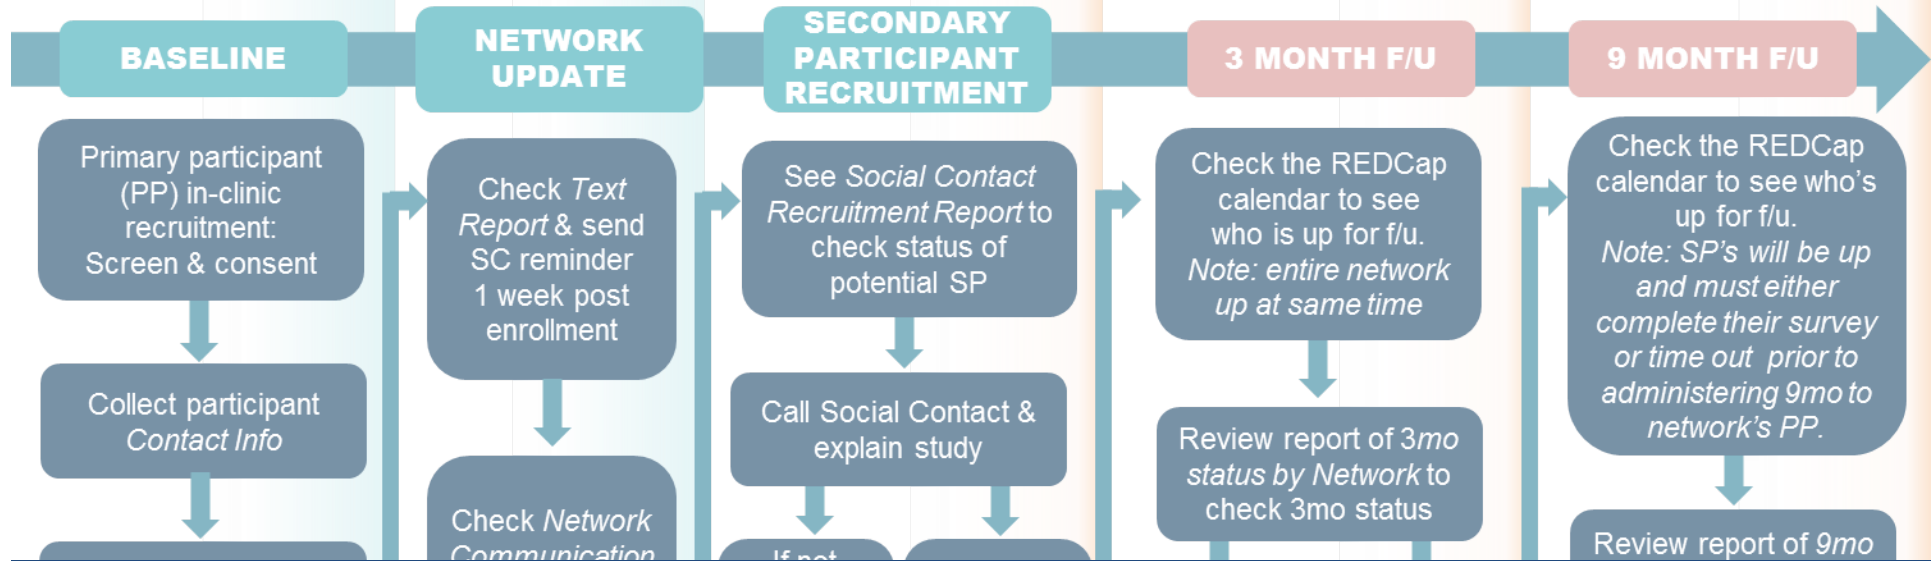

- PartyWise handout and website
- Weekly text messages for 8 weeks
- Designed to be delivered during clinic appointments
- Encourages participants to think about the choices in their lives related to alcohol

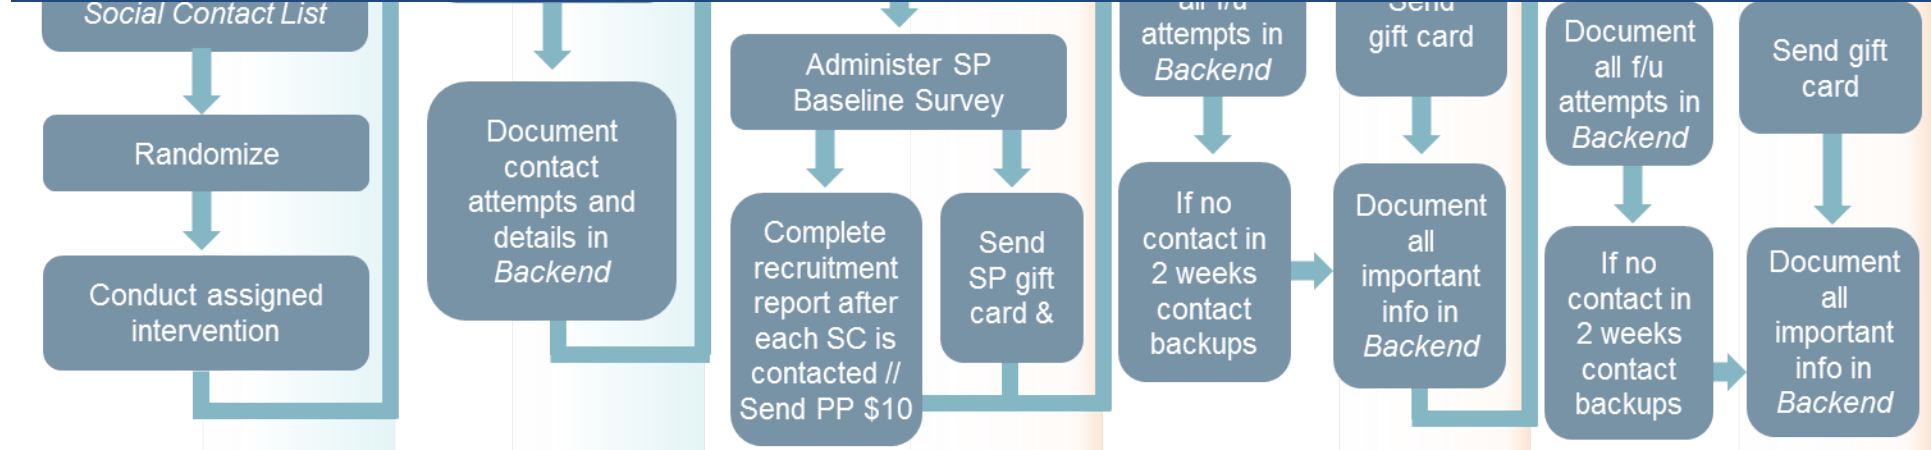

Evaluation Design

- Primary participants recruited from 8 clinics to receive *SpeakOut* or control intervention, *PartyWise*
- Secondary participants (peers) recruited through network sampling process
- Surveys administered at baseline and 3-months post intervention delivery

So many steps!

CONSENT TO PARTICIPATE IN A RESEARCH STUDY**

Study Title: UCSF Share Health Study

This is a study on health programs about birth control and alcohol for young people. The study researchers, Christine Dehlendorf, MD, MAS and her research team from the UCSF Department of Family and Community Medicine will explain this study to you.

Research studies include only people who choose to participate, so please take your time to make your decision. If you have any questions, you may ask the researchers.

You are being asked to take part in this study because you:

- Are between 15 and 19 years old
- Are comfortable asking your close friends and family to join a health study

Why is this study being done?

The purpose of this study is to provide information about health programs for young people, and how young people talk to their friends about their health.

How many people will take part in this study?

About 2,250 people will take part in this study.

>>

CONSENT

PARTICIPATION IN RESEARCH IS VOLUNTARY. You have the right to say that you don't want to be in this study, or to withdraw from it at any point without penalty or loss of benefits.

Do you wish to participate in this study? We will give you a copy of this form to keep.

Yes No

The next sentence refers to the use of medical claims data as discussed above. Please read the sentence below and think about your choice. After reading the sentence, check "Yes" or "No." If you have any questions, you may ask the researcher.

No matter what you decide to do, it will not affect your care.

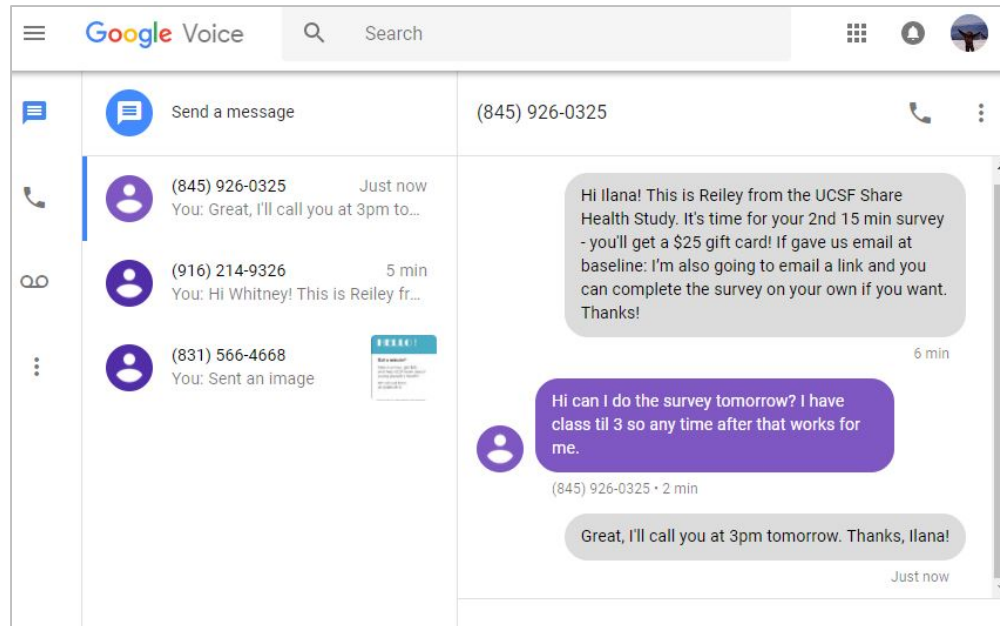

My FamilyPact or Medi-Cal data may be used to help learn about health programs for young people.

Yes No

<< >>

GoogleVoice

- Ability to forward to 5 phones
- Call and text history easily tracked and deleted

Primary Participant Baseline Processes

- Primary Participants recruited in-clinic & consented
- Baseline survey administered via on an iPad
- List of peers who may be interested in study participation entered in on an iPad
- Paper and digital study info cards given to support recruitment of peers
- Randomization

Two screenshots of the REDCap interface are shown. The top screenshot is titled "Social Contacts List" and displays a table with four rows for "Name 1" through "Name 4". The "Name 3" row is highlighted in green and contains the name "Ilena". The bottom screenshot is titled "Share Health Study Survey" and shows a survey form with several questions. The first question is "What is the reason for your clinic visit today?" with radio button options: "I am getting an IUD today", "I am getting a contraceptive implant (Nexplanon) today", "I have a follow-up appointment for my IUD or contraceptive implant (Nexplanon)", and "Other". The second question is "Do you have to pay money for any part of your clinic visit today?" with radio button options: "Yes", "No", and "Don't Know". The third question is "What language or languages do you usually speak when you are at home or with your family?" with checkbox options: "English", "Spanish", "Chinese language such as Mandarin or Cantonese", and "Other language". The fourth question is "What is your date of birth?" with a date picker set to "Today" and a "Submit" button at the bottom.

Social Network Recruitment

- Network update text sent 1-week post-intervention
- Phone call to Primary Participant 2-weeks post-intervention
- Social Contacts interested in participating are screened and consented by phone, using a screening instrument
- Once consented, a separate record is created for Secondary Participants

Social Contact #1

1. Did you ask Christine if they are OK with us contacting them about the study? Yes No

What did Christine say? OK to be contacted by the study Does not want to be contacted by the study

Would Christine prefer to be called in English or Spanish? English Spanish

What is Christine's phone number?

Can we text them about the study? Yes No

Email:

If we ever have trouble getting in touch with you about the study, can we contact Christine to help get in touch with you? Yes No

Social Contact #2

2. Did you ask Edith if they are OK with us contacting them about the study? Yes No

Why didn't you ask Edith if they were OK with the study contacting them? I wasn't able to get in touch with her I forgot to ask her I didn't feel comfortable asking her

Social Contact #3

3. Did you ask Paula if they are OK with us contacting them about the study? Yes No

Backup Contact and Network Update Documentation

Is the back up contact (carroll) this participant listed at baseline the same as any of the social contacts they approved as back up contacts above? Yes No

What is this participant's network update status? Complete In process, participant still needs to tell social contacts about the study Incomplete, unable to reach the participant Timed out without completing the Network Update

NorCal/UCSF Network Communication Status										
Study ID record_id	Event Name redcap_event_name	Has the participant been sent a text a reminder text for their network follow-up call? p_networktext	Can we text you at this number? We will identify as a [baseline_a ..._usc_ucsf] study when we text. p_pttextok	When did the participant enroll in the study? p_enrollment	When does their Social Network update time start? *schedule 2 weeks from intervention delivery* socnetworkdate	By what date should we have reached the participant's social contact ... e* *4 weeks post-Intervention* sc_rct_due	What is this participant's network update status? networkstatus	Network Update Notes (ex. sent gift cards for Social Contacts, how ... as the participant contacted?) p_networknotes	First and last name: p_pptname	Phone number (with area code): p_pptphone

Survey Administration

- Surveys are administered in person, by phone with a RA or independently via emailed survey link
- Follow-up reminders made via phone call and text using Google Voice and email through REDCap, based on participant preferences

Share Health Study Survey Resize font: [+] [-]

Thank you for participating in this study. When you are finished with the survey, we will send you a \$25 gift card.

This survey has questions about your health, including experiences with birth control, sexual activity, alcohol, tobacco, and other drugs. Please fill out this survey as completely and honestly as you can. Your answers will be kept private and will only be used for research purposes. Your name will never be kept with your answers. Please let the research staff know if you need help or are uncomfortable answering any questions.

What birth control method(s) are you currently using to prevent pregnancy?

Check all that apply:
** must provide value*

- Pill (Birth control pill)
- Patch (Birth control patch)
- Ring ("Nuvaring")
- Shot ("Depo")
- Hormonal IUD (Mirena, Liletta, or Skyla)
- Non-hormonal IUD (Paragard or "copper T")
- Implant (Nexplanon or Implanon, rod under skin of arm)
- Condoms
- Withdrawal/pulling out
- Other
- I am not currently using a method to prevent pregnancy

Share Health Study Survey

To: Silverstein, Ilana

Hi Ilana,
This is Reiley from the UCSF Share Health Study. It's time to complete your 2nd survey - it'll take about 15 min and you'll get a \$25 gift card in the mail when it's done!
Call or text back to let me know when a good time would be for us to connect and complete your survey. The number is (415) 480-4915.
You can also complete the survey online by following this link below. Once I see it's done, I can send you your \$25 gift card.
Thanks!
Reiley

You may open the survey in your web browser by clicking the link below:

This link is unique to you and should not be forwarded to others.

Recruitment & follow-up numbers so far...

Enrollment

Primary Participants: 111
Secondary Participants: 83

Primary Participants

Follow-up rate: 85%

Survey Completion Method

Secondary Participants

Follow-up rate: 93%

Survey Completion Method

Next Steps

- Continue recruitment through the end of 2017 and in to early 2018
- Conduct analysis on available data in 2018
- Currently pursuing other funding opportunities to complete rigorous evaluation of *SpeakOut*

Thank you!

Reiley Reed
